

Information sheet – Adjustable Grip Band with Attachable Foam

The grip band has been designed for ladies with hair loss to prevent their scarves from sliding off their scalp. The added foam is for those who require a little height to build up volume around their face and eliminate the “flat” look. We recommend you use 100% cotton scarf, as it is a natural fibre that allows the skin to breathe.

STEP 1

Place the stretch band across your forehead on the line of your natural hairline over your ears and down the nape of your neck, closing at the back. The band should be firm but not too tight.

STEP 2

Add to your band the foam section, by placing the small Velcro section on the foam, firmly on top of the Velcro section on the band, making sure the curved section (with label) is pointing to the crown (top) of the head. This will give you height; so only add if height is required.

STEP 3

Tie scarf as usual using stretch band and foam attachment as a base.

TO TIE SCARF

Fold scarf to form a triangle, then fold the longest straight edge back approximately 8cm (this adds volume). Place the scarf on the head over the grip band and tie firmly at the base of the neck. Allow centre point of triangle to drop and tie again, this time catching and anchoring at the centre point

WASHING AND CARE

Warm wash separately
Do not bleach or tumble dry
Dry away from direct heat
Warm iron

Please Note:

This is not a sun protection device.
Please remember to protect your scalp against the sun and ask your doctor for a recommended sun block suitable to your skin
